

VALTO360°

MANAGE THE OPERATING ENVIRONMENT

PRODUCT FOR INFORMATION AND FACILITY MANAGEMENT

VALTO360° is a functional solution where a digital copy of the company's operating environment is made. Target points are added to the virtual and physical space and the necessary documents and information are linked to them. The spaces are presented as easy-to-adopt floor plans, 3D images and 360° photographs.

ACCURATE LOCATION DATA

VALTO360° is an operating and service environment solution for spaces where there is a lot of space and object information that requires attention and review.

INFORMATION IN THE RIGHT PLACE

VALTO360° was originally developed to cover the needs of the production industry and is well-suited to reporting, documentation and monitoring.

Data scattered across different systems and directories is displayed in the POI where it is needed, irrespective of time and place.

DIGITAL TWIN

We use the VALTO360° product environment to virtualise our customer's operating and production premises.

We make a digital, interactive copy of the production environment using 360° images and floorplans. The points of information (POI) and icons as well as the QR codes for the production premises are added to the platform.

SAFETY

VALTO360° it is possible to manage and maintain work safety as well as the safety of the work environment.

PRODUCTIVITY

VALTO360° contains the necessary information in production mode. This facilitates the management of facilities and information.

BUSINESS PROCESSES

VALTO360° collects relevant information to the control panel, and displays an overview of the status of the production plant.
