

# VALTO360°

Digital and real world in the same package

## Take control of data, resources and facilities

THE DIGITAL TWIN OPENS A NEW VIEW OF REALITY

- Data is a key production resource today. VALTO is an operational view of the company's information and premises. Scattered information is collected where it is needed and take the information to effective use. Immediate access to information significantly improves operations and cost-effectiveness.

" We help companies **MANAGE** business **ASSETS**, as well as all **KNOWLEDGE**."

### VIEWS OF FACILITIES AND LOCATIONS

The interface is a visual view of the company's premises. The spaces are clearly presented as floor plans, 360° photos and 3D models.

### POINTS OF INTEREST (POI)

POIs have been added to the destination, which contain all the necessary information about the instruments, furniture and facilities, from the life cycle history to occupational safety.

### DIGITAL MATERIALS

Digital material is collected to the information point (POI) from the customer's own systems and distributed to users according to defined access rights.

## Functionality

MORE THAN THE SUM OF ITS PARTS

- VALTO360° has several performance-enhancing features for optimizing and managing work processes. The management of digital material and the smooth coordination of projects improve resource and cost efficiency.
